

Work Experience

Resonant Cavity Product Consultant

(April 2019 - Present)

Working with the CEO to understand the landscape around mobile-first tools for creativity. Focused on music/audio and their popular app Voloco (#46 in the iOS App Store's Music category and rapidly rising.)

Coinbase Software Engineering Intern

(May 2019 - Aug 2019)

Shipped a product that empowered Coinbase engineers to scaffold new services in just a few clicks – instantly functional, and prepared for deployment to AWS – with their choice of languages, DBs, platforms, add-ons.

Contrary Capital Engineering PM

(Jan 2018 - Jan 2019)

Led a small team in building internal products + infrastructure to make deal flow more effective and efficient. Previously built initial tech tooling, marketing website, and recruiting platform as an engineering on the team.

First Look Media Software Engineering Intern (hackNY '18)

(May 2018 - Aug 2018)

Conceptualized, designed, and implemented a new platform to create/manage fundraising campaigns for The Intercept and other media properties of FLM. A/B testing showed ~100% increase in conversions.

SendGrid (acq. Twilio) Software Engineering Intern

(May 2017 - Aug 2017)

Helped launch SendGrid's Marketing Campaigns – an email design + marketing product – before IPO.

Forward Philly Software Engineering Intern

(May 2015 - Aug 2015)

Wrote software for a real estate deal-flow automation startup dealing with 1mm+ Philly property records.

More positions + details listed on LinkedIn.

Education

University of Colorado, Boulder B.S. Computer Science (May 2020)

A complete list of my coursework is at github.com/krrishd/academic-plan

Community
