Awards/Honors

Best Health Hack - PennApps (2015)
Won two prizes: Best Health Hack and Best Consumer Health Hack. Featured in Daily Penn: www.thedp.com/article/2015/01/high-school-students-penn-apps-team-2015

1st Place – GoCodeCO Denver (2014)
Built app that connects students to jobs algorithmically. Also made regional top 10 where winners win $25k from the state + $250k contract. Challenge run by Google and Colorado Secretary of State.

Work Experience

Product Designer – Slice Capital (2015 – Present)
Leading product design on iOS, redesigned landing page, developed waitlist software, developed internal FINRA-compliant dashboard; named as one of *Inc.com*'s Coolest College Startups of 2016.

Freelance Software Engineer (2012 - Present)
Working with a large variety of clients on predominantly web-based products. Scope is typically full-stack and often includes product design as well.

Software Engineering Intern – Forward Philly (Summer 2015)
Worked on software + data analysis for a real estate automation startup dealing with 1M+ Philly property records. Done through the PennApps Fellowship.

Software Engineering Intern - Globality (Winter 2013)
Worked on a network analysis dashboard (FB/Twitter/LinkedIn data), primarily implementing data visualization and mapping using Angular/D3/Leaflet.js.

Projects/Volunteering

Mentorship/Software - Design for America, Boulder (2015 -)
Working on organizational software needs as well as as an on-call resource for member-lead initiatives.

Organizer - HackCU (2015 -)
Working on design/development tasks + logistics.

Organizer - CodeDay Denver (2012 - 2014)
Worked as the lead organizer for CodeDay Denver and CodeDay Boulder, handling everything from promotions to logistics to sponsorship/venues.

Web - Global Space Balloon Challenge (2014 - 2015)
Worked on the user interface for the official website and participant platform. Featured by *Popular Science*.
